
SECOND SUBSTITUTE SENATE BILL 5157

State of Washington

54th Legislature

1995 Regular Session

By Senate Committee on Ways & Means (originally sponsored by Senators Owen, Drew, Sutherland, Hargrove, Oke and Haugen)

Read first time 03/06/95.

1 AN ACT Relating to conspicuous external marking of hatchery
2 produced chinook salmon and coho salmon; adding new sections to Title
3 75 RCW; and creating a new section.

4 BE IT ENACTED BY THE LEGISLATURE OF THE STATE OF WASHINGTON:

5 NEW SECTION. **Sec. 1.** The legislature declares that the state has
6 a vital interest in the continuation of recreational fisheries for
7 chinook salmon and coho salmon in mixed stock areas, and that the
8 harvest of hatchery origin salmon should be encouraged while wild
9 salmon should be afforded additional protection when required. A
10 program of selective harvest shall be developed utilizing hatchery
11 salmon that are externally marked in a conspicuous manner, regulations
12 that promote the unharmed release of unmarked fish, when and where
13 appropriate, and a public information program that educates the public
14 about the need to protect depressed stocks of wild salmon.

15 NEW SECTION. **Sec. 2.** The department shall mark appropriate coho
16 salmon that are released from department operated hatcheries and
17 rearing ponds in such a manner that the fish are externally

1 recognizable as hatchery origin salmon by fishers for the purpose of
2 maximized catch while sustaining wild and hatchery reproduction.

3 The department shall mark all appropriate chinook salmon targeted
4 for contribution to the Washington catch that are released from
5 department operated hatcheries and rearing ponds in such a manner that
6 the fish are externally recognizable as hatchery origin salmon by
7 fishers.

8 The goal of the marking program is the annual marking by June 30,
9 1997, of all appropriate hatchery origin chinook and coho salmon
10 produced by the department with marking to begin with the 1994 Puget
11 Sound coho brood. The department may experiment with different methods
12 for marking hatchery salmon with the primary objective of maximum
13 survival of hatchery marked fish, maximum contribution to fisheries,
14 and minimum cost consistent with the other goals.

15 The department shall coordinate with other entities that are
16 producing hatchery chinook and coho salmon for release into public
17 waters to enable the broadest application of the marking program to all
18 hatchery produced chinook and coho salmon. The ultimate goal of the
19 program is the coast-wide marking of appropriate hatchery origin
20 chinook and coho salmon, and the protection of all wild chinook and
21 coho salmon, where appropriate.

22 NEW SECTION. **Sec. 3.** The department shall adopt rules to control
23 the mixed stock chinook and coho fisheries of the state so as to
24 sustain healthy stocks of wild salmon, allow the maximum survival of
25 wild salmon, allow for spatially separated fisheries that target on
26 hatchery stocks, foster the best techniques for releasing wild chinook
27 and coho salmon, and contribute to the economic viability of the
28 fishing businesses of the state.

29 NEW SECTION. **Sec. 4.** If specific funding for the purposes of this
30 act, referencing this act by bill number, is not provided by June 30,
31 1995, in the omnibus appropriations act, this act shall be null and
32 void.

33 NEW SECTION. **Sec. 5.** Sections 1 through 3 of this act are each
34 added to Title 75 RCW.

--- END ---
